Specifications are subject to change without notice.

The Pacific Three Speed Blower provides a powerful source of air for drying carpet, hard floors and for additional ventilation.

Carpets can be dried 25% to 50% faster.

It is especially useful in drying out after floods.

The 3-speed switch lets you set the air flow to your specific needs.

The easy to grip handle makes it easy to transport.

The built-in cord wrap neatly stores the cords and keeps it out of the way.

The units stack for storage using minimal space.

The protective grills on the intake and exhaust provide added protection from accidental injury.
