

Polishers

Pacific's legendary polishers are simply among the best.

SeaRay DS

SilverRay

Mini-Edger

SeaRay

SeaRay 175 HD

Made with quality components, Pacific polishers continue to perform year after year. That's because they're designed for easy handling, high performance and longevity. A staple in any equipment fleet, Pacific polishers are ideal for stripping, scrubbing, spray buffing, sanding and bonnet cleaning.

All of our models feature a high torque motor, precision-cast base, triple planetary gear box, ergonomic trigger grips, protective bumper, and an adjustable steel handle with cord wrap. Select from 13", 17" or 20" widths, single or dual speed models, and high polished aluminum or powder coated aluminum base.

Use the SeaRay 175HD (Heavy Duty) for scarifying, grinding and sanding applications. This machine features a totally enclosed external fan cooled 1.5 hp AC motor that prevents the entry of concrete dust and sawdust, thus preventing wear from grit passing through the motor.

Unique to our polisher series is the popular Mini-Edger. This versatile hand-held cord-electric model uses either a pad, brush, or bonnet allowing you to clean in corners, baseboards and tight areas.

Add the optional EZ Install solution tank to your Pacific polisher, and your machine becomes a scrubber.
