POWER SWEEPER

NOTE

This manual covers Model 265 machines equipped with the High Dump Modification and Oilgear Hydraulic pump. For machines equipped with Vickers Hydraulic pumps, use manual number MM114.

Your sweeper will give you excellent service and cleaning results, and save you maintenance expenses. However, as with all specially engineered mechanical equipment, you can get best results at minimum costs--if:

- (1) You operate your machine with reasonable care, and
- (2) Maintain your machine regularly--following the maintenance instructions provided.

You may order parts and supplies direct from TENNANT COMPANY, P. O. Box 1452, Minneapolis, Minnesota 55440. A complete, illustrated machine PARTS LISTING is included in this Manual. A phone or wire order will receive our prompt attention.

Contact your nearest TENNANT Factory Representative for information or assistance concerning your machine.

INSTRUCTIONS FOR ORDERING REPAIR PARTS

To avoid errors or delay in filling your parts orders, please furnish all information requested.

1. Refer to TENNANT data plate. Always specify the model number and serial number.

2. Give part number, description and quantity needed of each item on order. Do NOT order only by reference number of illustrated figure numbers.
3. Indented items indicate parts of assemblies. Standard hardware is furnished only when part of purchased assembly. In other cases, we suggest ordering common hardware from your local hardware supplier.
4. If old part cannot be identified, send it to us with quantity needed specified on order.
5. State definite shipping instructions to include shipping address and/or billing address if there is a difference.
6. We shall be glad to quote on any part or group of parts at your specific request.

Any claim for loss or damage to a shipment in transit should be filed promptly against the transportation company making the delivery. Shipments will be complete unless the packing list or order acknowledgement indicate items back ordered.

If parts received are suspected to be incorrect or defective, please write, wire, or phone our Customer Services Department, Minneapolis Office. They will give you authorization for return and/or handle replacement shipments when required.

FIG. 25 - RECOMMENDED SWEEPING & SCRUBBING BRUSHES

SWEEPING BRUSHES

TENNANT Part No.	Descriptions	Size
53063	HIGH DENSITY COMBINATION, natural fiber & crinkle wire-adds stiffness, increases brush life.	42 in.-24 row
53064	NATURAL FIBER, ideal for sweeping average soilage	42 in.- 8 row
53065	CRINKLE WIRE, provides maximum cleaning action for heavy semi-impacted soilage & hard-to-sweep dirt.	42 in.- 8 row
53067	COMBINATION, crinkle wire & natural fiber	42 in.- 8 row

PARTS LIST

INSTRUCTIONS FOR ORDERING REPAIR PARTS

To avoid errors or delay in filling your parts orders, please furnish all information requested.

1. Refer to TENNANT data plate. Always specify the model number and serial number.

2. Give part number, description and quantity needed of each item on order. Do NOT order only by reference number of illustrated figure numbers.
3. Indented items indicate parts of assemblies. Standard hardware is furnished only when part of purchased assembly. In other cases, we suggest ordering common hardware from your local hardware supplier.
4. If old part cannot be identified, send it to us with quantity needed specified on order.
5. State definite shipping instructions to include shipping address and/or billing address if there is a difference.
6. We shall be glad to quote on any part or group of parts at your specific request.

Any claim for loss or damage to a shipment in transit should be filed promptly against the transportation company making the delivery. Shipments will be complete unless the packing list or order acknowledgement indicate items back ordered.

If parts received are suspected to be incorrect or defective, please write, wire, or phone our Customer Services Department, Minneapolis Office. They will give you authorization for return and/or handle replacement shipments when required.

FIG. 18
VACUUM WAND KIT #54016

HOW TO USE THE VACUUM WAND

1. Open the hopper inspection door.
2. Turn the plug handle and remove the expandable plug (shown in parts drawing) from the fire door.
3. Release the spring-loaded catch from the fire safety link by moving it to one side, then close the fire door.
4. Remove the hose and wand from the clips on the hopper cover.
5. Slip the hose cuff over the tube on the fire door.
Leave the inspection door open. Attach the other end of the hose to the wand.
6. Start engine and turn on vacuum fan.
7. Use the vacuum wand to pick up debris in out-of-the-way locations which cannot be reached by the sweeper.
