SC750_{26D}

Factory Rebuilt Walk-Behind Scrubber

WHAT IS FACTORY REBUILDING?

To us, factory rebuilding isn't just a quick cleaning job; we inspect everything on the machine, replace every wearing part, and restore the performance of the machine to original factory specifications. In fact, the work is done at a Nilfisk owned factory by the techs who know the machine from the ground up. Our process REPLACES (not inspects) all of the following with ORIGINAL Advance Parts: Batteries, power cables, wiring harness, vacuum motor, squeegee mount, squeegee blades, all filters, all gaskets, all seals, rear castors, all bumper wheels, brush skirt, vacuum hoses, solutions hoses, hose clamps, moment switches, and decals. Some parts are serviced, or replaced with new as needed, these include: Brush motors, transmissions, drive motor, lift motor, control panels, tanks, chassis parts, main drive wheels, and chemical mixing pump. Each machine is inspected and rebuilt, then tested before shipping on a factory designed shipping pallet. Know you are purchasing a rebuilt machine using OEM parts, not a used machine with a shiny coat of spray polish and aftermarket, subgrade parts. Each machine carries a 30 day unconditional warranty covering any defects in workmanship.

Operation and Performance:

The SC750 walk-behind scrubber by Advance provides an outstanding cleaning ability with a low-maintenance design. Reduced dump/fill cycles results from a large tank that permits continuous scrubbing for 84 minutes per tank.

Ideal applications include:

- Routine scrubbing
- Ultra-light to heavy scrubbing
- Entryway cleaning
- Spill cleanup
- Grease removal
- Grout and porous-surface cleaning
- Detergent residue removal
(using water only)

Factory Rebuilding Includes:

- New Batteries
- New Skirt
- New Hoses
- New Vac Motor
- New Squeegee Blade & Parts
- New Wiring Harness

Maintenanced Items or Replaced:

- Tires & Castors
- Control Panel
- Bumpers
- Lift Motors
- Tanks & Filters
- Brush Motors
- Switches
- Charger
- Buttons

SC750^{26D}

Factory Rebuilt Walk-Behind Scrubber

A built-in squeegee hanger makes transport easier and reduces trip and fall accidents.

Includes chemical mixing

Most units have a new control panel with a digital display.

New squeegee parts:
Wheels, bumpers, and blades

New batteries

New tank seals & gaskets

New electrical wire harness

High capacity solution/recovery tanks - 21 gal

Cleaned tank

New vacuum motor

Polished body

New decals
& warning labels

Rebuilt brush,
drive, & lift motors

On board fully
automatic charger

New skirt

New hoses

New 13" pad drivers

Painted chassis

Gray,
non-marking
solid tires deliver
superior traction

New filters

New castors
