

TROUNCE

The most versatile spotter you can have. Try it first. It dries fast and does not set the spot. Allows you to be a real hero in a hurry. Trounce is a solvent dry cleaning spotter for colorfast carpets and upholstery. It works best as the first try on spots and in the removal of gum, tar, varnish, asphalt, oil, grease, lipstick, etc.

Directions:

Trounce should be applied on a clean cloth or sponge, then wiped over the dirty fabric. This solution should not be diluted – use as is. When in doubt as to the type of spot or stain, try Trounce first. If not effective, it will evaporate quickly then you can use another spotter. Always use your extraction machine after using any spotter.

HAZARD WARNING: Lung, eye, and skin irritant.

PRECAUTIONS: Keep away from heat, wear impervious gloves, chemical eye protection and maintain good ventilation. Use appropriate respiratory protection if PEL or TLV is exceeded.

FIRST AID: Contact – Wash with soap and water.
Inhalation – Remove to fresh air.
Ingestion – DO NOT induce vomiting. Get prompt medical attention.
Eyes – Flush with water. Get medical help in all cases
