## PIEZO TECHNOLOGY SYSTEM

The **BREEZE PIEZO TECHNOLOGY SYSTEM** is Big D's exciting new alternative to all other deodorizing systems. Inside the **BREEZE DISPENSER**, a ceramic piezo disc vibrates as electricity passes through. This propels the ultra fine **BREEZE FRAGRANCE** particles into the room. The particles are only one micron in size and will stay airborne up to two hours.

The **BREEZE PIEZO TECHNOLOGY SYSTEM** uses safer chemical formulations than traditional aerosol sprays, with lower, no added VOC. Dispensers can be placed in restrooms, hotels, offices and schools, improving indoor air quality. The air you breathe is better, making your surrounding environment much more pleasant.

Benefits of the **BREEZE SYSTEM** include:

- No metal cans
- Less packaging – making it more eco-friendly
- Reduced carbon footprint
- No isobutane or acetone
- Lower operating cost – more product for the money
- Consistent fragrance from start to finish
- Seven indulgent Big D fragrances to choose from
- Worry-free fragrance refills last up to 90 days
